

SWITA COVID-19 precautions

- 1). Regular bus sanitizing---SWITA buses are deep cleaned on a regular basis and drivers wipe down and sanitize high traffic areas and touch points after every route.
- 2). Drivers are required to wear masks while transporting clients.
- 3). We highly recommend passengers wear masks
- 4). To aid in social distancing we are limiting buses to 50% of capacity and only allowing 1 person per seat cluster or a max of 2 individuals per row.

Recommendations for Riding the Bus

Riders are strongly encouraged to follow public health guidance:

- Cover coughs and sneezes;
- Stay home if you are sick;
- Wash hands regularly with soap and water for at least 20 seconds;
- Use hand sanitizer containing at least 60% alcohol if soap & water are not available;
- Practice good hygiene and maintain physical distance while on buses and waiting at bus stops.

Additional Covid-19 information can be found by visiting the CDC website listed below.
